Vacancy announcement

Job Purpose/Summary

The **Facilities Engineer** (Chemical/Process) leads facilities small to medium projects for APCC from definition phase through start-up and handover to Operation. He manages on ad hoc basis various deliverables of the project such as AFE justification, design, engineering, and construction contracts. He has a leadership role in overseeing contract execution activities during fabrication, construction or installation and commissioning phases of the project.

Main Mission/Result Area

PRIMARY ACCOUNTABILITIES

- Carry out process engineering design, sizing and flow schemes calculations on piping, pipelines, vessels, valves, and other equipment on minor projects on the facilities offshore.
- Carry out feasibility studies, concept selection, detail design on upgrade projects.
- Deliver projects safely, on time, within budget and according to the company policy and specifications.
- Perform the role of contract holder or company representative for associated contracts and coordinate delivery of technical support during construction.
- Maintain efficient interfaces with the operations department.
- Ensure that own actions plus those of contractors are conducted in accordance with the company's HSE management system.

HSSE Accountabilities

- Select and design safe engineering processes for the facility.
- Participate in all HSSE intervention schemes (APIPP, Incident reporting, site visits) and awareness sessions (HSSE Meetings, events and trainings) to maintain and improve Company HSSE culture and performance.
- Understand the emergency procedure and the related requirements.
- Lead as a role model to improve HSSE engagement within direct team, section, and department.

The incumbent may perform other related duties as assigned.

Key Challenges

- Meet all HSE, budget, schedule and quality requirements.
- Utilize resources from both within and outside own department.
- Lead a project team comprising both full and part time dedicated staff.
- Coordinate project development and execution in a brown field environment.

Competence & Requirements

- B.Sc. degree Engineering or equivalent in relevant discipline (Process, Chemical, Mechanical, Petroleum)
- Ability to use Aspen Tech HYSYS process simulator.
- Familiar with process safety management
- Knowledge in equipment selection and sizing
- Awareness in other relevant engineering disciplines
- 3-5 years in the industry, preferably oil and gas related experience
Motivated individual who possesses good communication skills, leadership abilities with a can-do attitude.
- Able to work in a very diverse multi-cultural and multi-disciplinary environment.
- Strong interpersonal skills.

All interested candidates should submit a CV and cover letter
